Education

- **Iowa State University** — Ames, IA
  Ph.D., Mechanical Engineering (GPA: 4.0 / 4.0) — *2011 - 2016*
  Co-major: Biorenewable Resource and Technology
- **Huazhong University of Science and Technology** — Wuhan, China
  B.Sc., Mechanical Engineering — *2007 - 2011*

Research Experience

- **Argonne National Laboratory (ANL)** — Lemont, IL
  Postdoctoral Appointee — *June. 2018 - Present*
  - Developed a spreadsheet-based tool to quantify cost savings of aftertreatment devices from reduced engine-out PM and NO_x emissions.
  - Quantified life cycle emissions for renewable gasoline produced from catalytic fast pyrolysis of biomass feedstocks.
- **National Renewable Energy Laboratory (NREL)** — Golden, CO
  Visiting Postdoctoral Researcher — *Sep. 2017 - Dec. 2017*
  - Performed statistical analysis of the EPAct/V2/E-89 dataset to corroborate that blended ethanol does not increase PM emission from gasoline combustion.
  - Implemented a machine learning pipeline to accelerate high-throughput screening of zeolite catalysts for dehydrogenation of isobutane.
- **North Carolina State University** — Raleigh, NC
  Postdoctoral Researcher — *Sep. 2016 - May. 2018*
  - Developed a fast pyrolysis process model with Aspen Plus that is sensitive to biomass feedstock composition.
  - Analyzed product yields, energy consumption, and economics of hydrocarbon production from fast pyrolysis with various biomass feedstocks.
  - Conducted process modeling and economic analysis for biosugar production from lignocellulosic feedstock with mechanical refining.
  - Performed uncertainty quantification of biomass blending in biorefinery supply chain design.
  - Optimized blending ratios for different biomass combinations for minimized delivered biomass costs and minimized uncertainties in the delivered biomass costs.
- **Iowa State University** — Ames, IA
  Graduate Research Assistant — *Sep. 2011 - May. 2016*
  - Developed process models for various bioenergy systems with ChemCAD.

  - Performed life cycle inventory analysis of power production from fast pyrolysis heavy-end bio-oil.
  - Performed geospatial environmental assessment of power generation from fast pyrolysis heavy-end bio-oil.
  - Wrote Python programs for data preprocessing, geographic analysis of emission sources, allocation and visualization of emissions.

Skills

- **Life cycle analysis:** GREET
- **Process modeling:** Aspen Plus, ChemCAD
- **Programming:**
  - Proficient in Python (3 years experience)
  - Other: MATLAB, SQL, C++, git
- **Analytical skills:**
  - 2 years experience of data exploration, modeling, and visualization with the Python data stack (numpy, pandas, scipy, scikit-learn, matplotlib, seaborn, etc.)
  - Mathematical modeling, uncertainty quantification, linear and nonlinear programming, statistical analysis, machine learning, data analysis and visualization

Teaching Experience

- **ME 335L Fluid Flow Lab** Spring 2016
  - Instructed students in lab procedures
  - Graded pre-lab problems and lab reports
- **ME 436 Heat Transfer** Fall 2015
  - Graded assignments and exams

Awards

- China National Endeavor Scholarship 2009, 2007
- China National Merit Scholarship 2008
- Outstanding Academic Performance Award, Huazhong University of Science & Technology 2008
- Excellent Freshmen Award, Huazhong University of Science & Technology 2007

Journal Articles

- **Ou, L.**, Luo, G., Ray, A., Li, C., Hu, H., Kelley, S., Park, S. (2018). Understanding the impacts of biomass blending on the uncertainty of hydrolyzed sugar yield from a stochastic perspective. *ACS Sustainable Chemistry & Engineering.*

Book Chapters

- Dang, Q., **Ou, L.**, Thomas, A., Brown, R., Wright, M. M., Advances in the Life Cycle Assessment of Biorenewable Technologies, In: Advances in Environmental Research, Volume 55, Justin A. Daniels ed., Nova Science Publishers, Inc., 1-30, 2017.

Presentations

- Understanding uncertainty of transportation fuel production via biomass gasification and mixed alcohol synthesis, *poster presented at TCBiomass2015, Chicago, IL USA, November, 2015.*
- Techno-economic Analysis of Defatted Microalgae Hydrothermal Liquefaction Followed by Bio-crude Upgrading, *poster presented at TCS2014, Denver, CO, USA, September, 2014.*
- Optimal design and operation of combined first and second generation ethanol plant, *oral presentation at INFORMS Annual Meeting, Minneapolis, MN, USA, October 2013.*
- Techno-Economic Analysis of the Production of Hydrocarbons from Pyrolytic Sugars, *poster presented at TCBiomass2013, Chicago, IL, USA, September, 2013.*
